

Changes to the iprodione pesticides registration

All pesticides used in Canada must be registered under the *Pest Control Products Act*. Pesticides are re-evaluated to ensure that they continue to meet health and environmental requirements. Re-evaluation may result in the revocation of a product or product uses. Health Canada may also request changes to a product's label, including mitigation measures, use sites and application methods.

Iprodione is a fungicide used on greenhouse, orchard and field crops, ornamentals and turf. Highlights of the re-evaluation decision for the active ingredient **iprodione**, published on June 21, 2018, are summarized below.

Label changes for iprodione pesticides, as of June 21, 2020

Cancelled uses

Stop foliar application on the following crops:

- Alfalfa grown for seed
- Apricots
- Cabbage
- Canola
- Cauliflower
- Cherries
- Cucumbers (greenhouse)
- Cut flowers (greenhouse and outdoor)
- Ginseng
- Grapes
- Kidney beans
- Leeks
- Lettuce
- Onions
- Peaches
- Plums
- Prunes
- Raspberries
- Snap beans
- Strawberries
- Tomatoes (greenhouse)
- White beans

Stop seed treatments for:

- Canola
- Mustard
- Potato seedlings grown for seed

Stop use:

- On turf, including golf courses and sod farms
- For garlic seed dip

Other risk reduction measures

- For the treatment of potato seeds grown for table and processing purposes:
 - ✓ Plant back intervals updated
 - ✓ Limitation of treated seed amount per day updated
- Application in a closed cabin equipped with an adequate air filter preventing any contact between the occupant and the pesticide required for sowing treated carrot seeds
- Treatment against *Rhizoctonia* by soil drench only for ornamentals
- Application prohibited using portable equipment (foggers and nebulizers)
- Addition to the required personal protective equipment (PPE), including for handling imported treated carrot seeds
- Updated rates, number of applications and intervals between applications
- Updated restricted-entry intervals (REIs)
- Updated buffer zones

Users must follow the instructions on the updated labels.

Using a pesticide contrary with the label directions is a violation of the *Pest Control Products Act*.

Read the label

All pesticides registered in Canada have a Health Canada-approved label with a registration number. Read the pesticide label carefully, as it contains specific information on how to use it.

To find the most up-to-date label, use our online [label search tool](#), or search for “Health Canada pesticide labels” using your favourite search engine.

For more information

Re-evaluation decision [RVD2018-16](#), Iprodione and its associated end-use products.

The Health Canada-approved label is the official document for enforcement purposes. In the event of any discrepancy with the contents of this factsheet, the information on the label shall prevail.
